DETAILED ACTION

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(a) the invention was known or used by others in this country, or patented or described in a printed publication in this or a foreign country, before the invention thereof by the applicant for a patent.

Claims 1-4, 7 and 9 are rejected under 35 U.S.C. 102(a) as being anticipated by Ikegaya (6439663). Note the first housing (10), the second housing (60), locking means having a locking member (20), fastener (80), retainer portion (85), slide portion (82a), fixture portion (81, as shown in Figure 2), guide portion (82), slide portion height that is greater than the retainer portion (see Figure 1). Also note that apparent method of forming and assembling steps of claims 3 and 4, respectively, are not given patentable weight since the claims are article claims.

Claims 10-12 are rejected under 35 U.S.C. 102(a) as being anticipated by Ikegaya (6439663). Note the first housing (10), the second housing (60), locking means having a locking member (20), fastener (80), retainer portion (85), slide portion (82a), fixture portion (81, as shown in Figure 2), and guide portion (82). Also note that apparent method of forming step of claim 12 is not given patentable weight since the claim is an article claim.

Allowable Subject Matter

Claims 5, 6 and 8 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Claims 13-15 are allowed.

Response to Amendment/Argument

Applicant's response has been fully considered. Remaining issues are described in the above sections. Applicant argues that the expanded area (85) of Ikegaya does not increase rigidity of the binding frame. The expanded area (i.e. retainer portion 85) is arranged and constructed to increase flexural rigidity of the fastener (80) by allowing securement of the retainer portion to the cushion and housing (10) via holes (15a in 10, and 80a in 85). Such increases flexural rigidity by providing secondary structure to which the fastener is secured, thereby providing a unitary assembly. As such, Ikegaya has been properly applied to the instant claims.

Conclusion

THIS ACTION IS MADE FINAL. Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
